Studying at EICnam - Incoming mobility

EICnam offers to welcome international students in two modalities, in its apprenticeship programs throughout its network in France and at the Ecole Supérieure des Géomètres et Topographes in Le Mans under the student status.

Download down below our brochure in English or in Spanish.

Study in one of the EICnam’s apprenticeship programs

Created in 1997, the « n+i » network is a consortium of more than 70 French Engineering School including the EICnam. Throughout this network, the young international engineers with at least a bachelor’s degree can apply to study at EICnam in order to obtain a French engineering degree.

Once recruited by the EICnam, the international students benefit from an intensive training in French (in July-August) and then integrate a methodological upgrading program during 4 months. This program includes language and culture courses, but also an upgrading in engineering sciences (in the theme chosen by the student) as well as a "technological" part (practical work, laboratory work, etc...), always linked to the chosen theme.

Know more about the n+i
Study the Surveyor and Topographer's specialty at the ESGT

The ESGT recruits several foreign students each year, under the student status. This training is given in Le Mans.
